FRAMELESS GLASS ANCHORS

Frameless glass anchors are fixed through pre-cut holes in the frameless glass panels, and then affixed to the face of internal staircases, balconies and decks. All our glass anchor systems are suitable for both interior and exterior applications.

DISC ANCHORS MB50, MB75, MB100

For point fixing cantilevered glass balustrades, stainless steel disc anchors are available in three diameters, including MB50 (50mm diameter discs that must be used in pairs) and MB75 (75mm diameter) and MB100 (100mm diameter) which can be used as a single disc fix. Disc anchors are typically used with 12 and 15mm glass.

COLOUR OPTIONS:  SATIN S/STEEL  POLISHED S/STEEL

STUB POSTS

Stub posts are available in two main types: side fixed for the likes of internal staircases or decks, and base fixed which would generally be used in balconies and pool fencing applications. All our stub post systems can be used for both interior and exterior applications.

STUB POST SP155

The SP155 is a clean, contemporary-look stainless steel base fixed stub post that secures the glass panels above the deck or patio surface. It provides a clearance of 50mm between the bottom of the glass pane and the deck or patio for easy cleaning and drainage. SP155 stub posts can only be used with 12mm thick glass.

COLOUR OPTIONS:  SATIN S/STEEL  POLISHED S/STEEL

CHANNELS

Channels come in two main types: side fixed and base fixed. They are generally used in balconies, pool fencing and when designing for long glass panes that provide clear views. All of our channel systems can be used for both interior and exterior applications.

CHANNEL BA124

A side fixed channel with concealed fixings. The BA124 is fully adjustable for glass alignment and readjustment should your deck ever move. The BA124 channel can be used with 12mm and 15mm glass.

COLOUR OPTIONS:  SILVER FROST  POWDER COAT

CHANNEL PG120

The PG120 is a side fixed or base fixed channel with concealed fixings for clean, unbroken views. It is fully adjustable for glass alignment and readjustment should your deck ever move, and can be used with 12-21.5mm glass.

COLOUR OPTIONS:  BRUSHED ANODISED  POWDER COAT

For building consent an interlinking handrail and/or laminate glass may be required for protection against a fall.
